INSTRUCTIONS TO AUTHORS

Papers submitted to the Journal are only accepted on the understanding that they are subject to editorial revision and that they have not been and will not be published in whole or in part in any other journal.

English is the accepted language for papers. Manuscripts should be typewritten, double-spaced, and have wide margins on all four sides. The original and two copies of the entire manuscript, including two sets of all illustrations, should be sent to the Managing Editor of

DRUGS UNDER EXPERIMENTAL AND CLINICAL RESEARCH.

BIOSCIENCE EDIPRINT INC.

Rue Winkelried 8
1211 Geneva 1 - Switzerland

Title page. The title page should include the title and subtitle (if any), name of author(s), degrees, address from which work originated and necessary acknowledgement of financial support. An address for reprint requests should be given. *Running title and key words should be clearly indicated.*

Summary. A brief summary on a separate page should be included (what was done, found and concluded). The summary should not exceed 250 words.

The text. The text should be composed of the following parts: introduction, materials and methods, results, discussion and acknowledgements.

References. These should be listed at the end of the paper and superscript numbered serially as they occur in the text. Journal references should include, in this order: the author's last name, his initials, the title of the paper, the journal name in abbreviated form, volume, first page, and year. Book references should include the author's name, his initials, the title of the book, the publisher's name and the city and year of publication. Personal communications and unpublished data should not be cited. However, if absolutely necessary, these may be referred to in parentheses within the text.

Tables. Each table should be placed on a separate page with a brief heading. Tables should be typewritten (double-spaced); and numbered in order of appearance in the text. If necessary, abbreviations and/or symbols should be explained.

Figures. Two glossy, black-on-white photographic prints of each figure should be submitted. These should be done professionally, and should be legible even after the publisher reduces their size. A label indicating the figure's number, the name of the author(s) and the top of the figure should be pasted gently on the back. Figure legends should be numbered and typed on a separate sheet. All figures must be cited in the text.

A limited number of illustrations in full colour will be considered for publication, but the author may have to bear the full costs of their publication.

Footnotes. Footnotes to text and tables other than the title should be indicated by an asterisk (*) on the page where they appear. If more than one footnote appears on a page, the number of asterisks should be increased consecutively to indicate each additional footnote.

Permission. Materials taken from other sources must be accompanied by a written statement from both author and publisher, giving permission to **DRUGS UNDER EXPERIMENTAL AND CLINICAL RESEARCH** for reproduction.

Editorials, Letters, Book Reviews.

DRUGS UNDER EXPERIMENTAL AND CLINICAL RESEARCH will publish concise editorials expressing the personal opinion of the author on subjects of scientific or social importance related to the fields of drug research. Editorial manuscripts should not exceed 1000 words, should contain a minimum number of references, if any, and should be submitted in triplicate. Letters to the Editor that pertain to material previously published in **DRUGS UNDER EXPERIMENTAL AND CLINICAL RESEARCH**, or to other matters of interest to its readers, will be considered for publication. Such letters should not exceed 500 words in length and should include the name and address of the author. The editorial board reserves the right to accept, reject or make an excerpt of letters without changing the views expressed by the author.

DRUGS UNDER EXPERIMENTAL AND CLINICAL RESEARCH is pleased to receive and review new books.

Reprints. Reprints (in multiples of 100) may be purchased by completing the order form sent with the page proof.
